Abstract:

Civil Society Organizations (CSOs) include community-based organizations as well as non-governmental organizations (NGOs), do not include business or for-profit associations. As the COVID-19 pandemic swept the globe, CSOs have a significant role for providing frontline help and defending the rights of people across the world. There are significant corruption risks during times of crisis. Civil society has an important role to play in ensuring funds to tackle the Covid-19 pandemic reach their destination. It has reshaped the megatrends buffeting the \$900 billion-a-year packaging industry. Therefore, this paper aimed to increase awareness to support civil society by applying innovative marketing methods such as changing the visual identity of the institution in order to support the principle of social distancing. In addition to, Providing treatment to Corona patients by sending packaging that also supports the principle of social distancing through the innovative packaging to help the state's efforts in facing the Corona crisis.. The level of consumers' knowledge of the concept and role of civil society organizations During the covid-19 pandemic was evaluated by using a questionnaire was prepared in Google Forms, comprising 11 questions five of this questions on a five-point Likert scale, ranging from strongly disagree (1) to strongly agree (5). Finally, this study shows the responses of target group on aspects of role of civil society organizations, the branding and packaging role during the Covid-19 pandemic, growth of online shopping, and the most important initiatives by civil society organizations during the corona virus pandemic. From this point, we start with the practical study by presenting proposals for different marketing tools to support the role of civil society organizations during crises

Keywords:

Civil Society Organizations CSOs, COVID-19 , social accountability, Packaging, Branding.

Paper received 17th June 2021, Accepted 24th July 2021, Published 1st of September 2021

Introduction

The disruptions caused by the COVID-19 pandemic started in Egypt in March 2020, and has since Economic activity slowed with social distancing measures and the temporary suspension of air traffic. The number of employed individuals declined by 2.7 million during the period April to June 2020, pushing unemployment to 9.6% from 7.7% the previous quarter, with job losses, especially among informal workers, reported mainly in retail and

wholesale trade, manufacturing, tourism, transport and construction (The World Bank, 2020). In addition to that, there are wider risks related to the accountability of governments and private companies. In normal times, CSOs would be well placed to monitor and report on governments and private companies, as well as hold them accountable for their actions. The current crisis poses several challenges to the roles of civil society, as shown in figure 1.

Figure 1: the roles of civil society

As a result of the stay-at-home orders in many countries, consumers have dramatically increased their digital engagement. Some industry forecasts predict that penetration will reach 10 percent in 2020, compared with 2 to 3 percent before the crisis. This will have significant implications for packaging design (Feber et al, 2020).packaging

companies should further rethink packaging design, beyond these existing must-have factors. Any packaging launched during the pandemic or in the near future should take into account three other important requirements, as shown in figure 2.

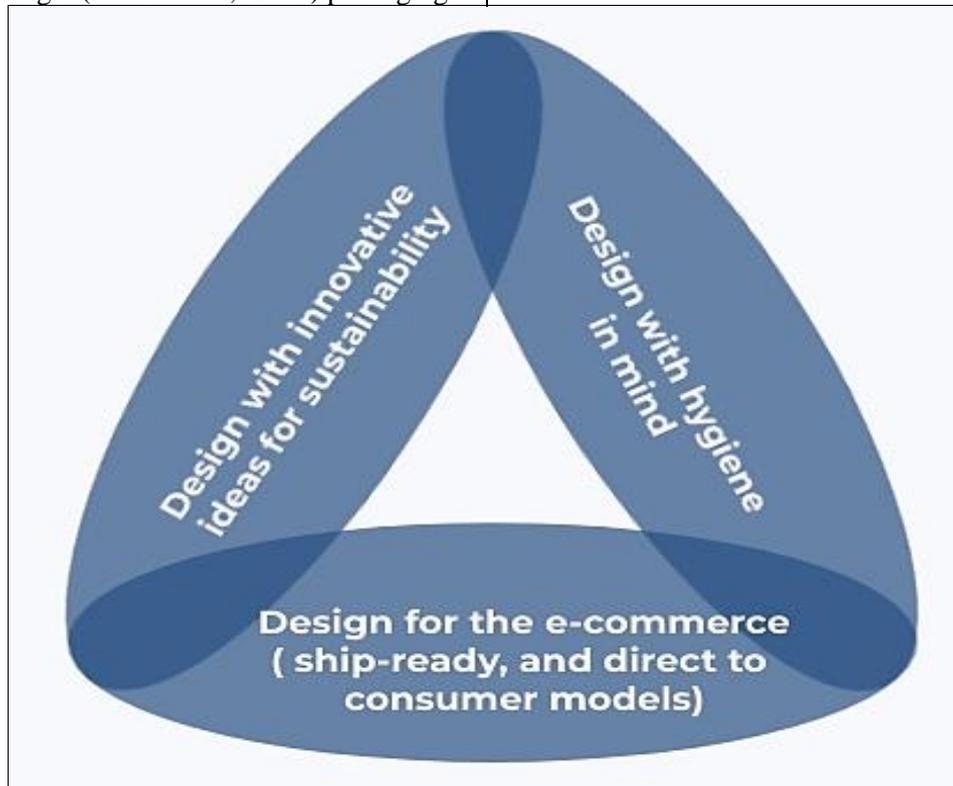

Figure 2: important requirements for packaging design during covid-19 pandemic

Current COVID-19 pandemic affecting the world of brand marketing and communications, thus many private-sector brands have reacted immediately by responding to the needs of a society that is facing a new way of life with remote working, no freedom of movement and spreading of this pandemic (Vicedo, 2020). These brands have demonstrated they know how to respond and continue offering what they always offer: Telephonic, IKEA, McDonald’s, and many others.

1.1 Branding and Crisis marketing

Many brands are no strangers to crisis management, but the global scale and continued uncertainty around COVID-19 is a first for us all. many have responded with meaningful approaches to give audiences a reason to believe that we’ll get through this crisis and move forward together. Care, creative thinking, and new tools can address customers’ acute needs today and forge stronger ties in the post-COVID-19 era, Particularly in times of crisis, a customer’s interaction with a company can trigger an

immediate and lingering effect on his or her sense of trust and loyalty (Diebner et al, 2020).Here are three impactful ways during the coronavirus pandemic(Shiple & Loar, 2020).

1.1.1 addressing customer concerns

To directly address consumers’ heightened concerns around protecting their health, McDonald’s outlined new precautions they’re taking, like required temperature checks for employees before and after shifts, as shown in figure 3.

1.1.2 pivoting toward a solution

Walgreens One of the largest U.S. pharmacies and a trusted leader in health care, Walgreens adapted their Ask a Pharmacist series into short, informative videos that answer customers’ common questions related to COVID-19. The brand also made a video ad to explain how people can safely take advantage of online care services and free prescription delivery, as shown in figure 4.

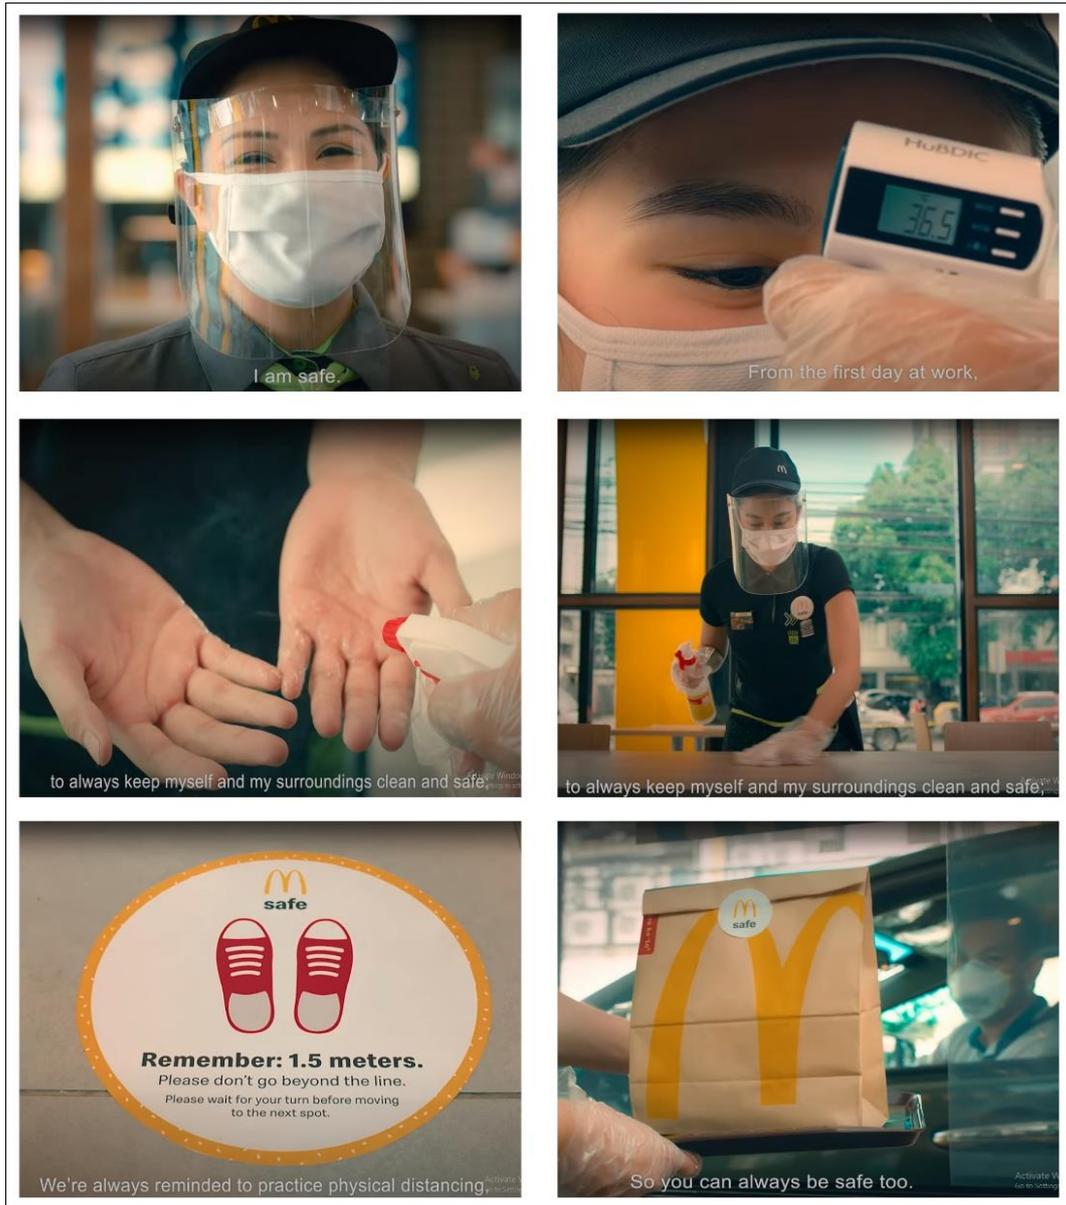

Figure 3: McDonald's outlined new precautions to ensure safety

The figure consists of six promotional cards arranged in a 2x3 grid. The top-left card has the text "We're in this together. See how we're making life easier." and the Walgreens logo "Trusted since 1901". The top-middle card has the text "Find care online" and "Feeling Sick? Stay home and consult with a healthcare provider online." with an illustration of a doctor. The top-right card has the text "Pharmacy Chat" and "Expert advice on medications for symptoms and more." with an illustration of a pharmacist and a customer. The bottom-left card has the text "Free Rx Delivery" and "Use Walgreens Express & get eligible Rx delivered right to your door!". The bottom-middle card has the text "Free Shipping" and "Shop online at home & get essentials shipped to you for free, no minimum.". The bottom-right card has the text "Drive-thru Shopping" and "Pull up & shop select health, cleaning & grocery items at drive-thrus."

Figure 3: Walgreens helping customers to stay safe

1.1.3 bringing people together as they stay safely apart

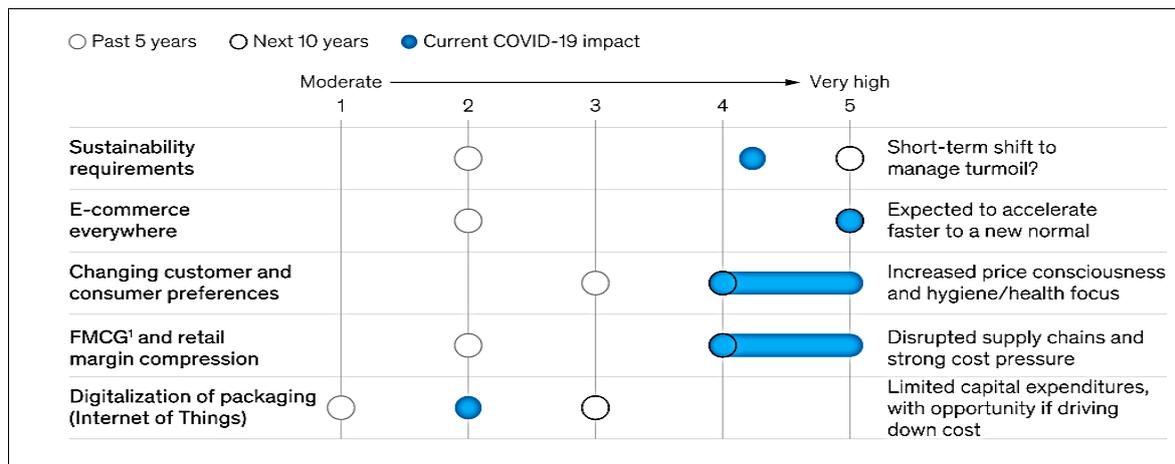

While being homebound causes stress and isolation for so many, Ikea sought to remind people of the stable worlds they had already created playing with kids, dancing, making music, or simply relaxing with loved ones (#I’mStayingHome) is a movement that was born in people’s homes, a, during this time, we can all live new experiences together.”

1.2 Packaging role during covid-19

Packaging has served three roles: protecting, promoting, and performing. With protection,

needs have evolved as the channels for getting products to customers have

Changed, and we’ll continue to see new developments. Packaging’s role in promotion is growing in importance and helping our customers increase their sales (McKinsey, 2019). Innovative packaging designs will play an important enabling role. Packaging companies will need to reassess their strategies in light of these evolving megatrends, packaging are changing with the covid-19 crisis (Feber, Lingqvist and Nordigården, 2020), as shown in figure 5.

Source: McKinsey & company

Figure 5: observed and expected impact of trends on packaging industry, scale 1-5

During coronavirus Packaging between disposable and sustainable, before the start of the coronavirus outbreak, cities and states were making some progress on banning plastic bags, shifting from single-use plastic to paper products and encouraging shoppers to bring reusable bags (Newburger and Lucas, 2020).

But now health concerns over Covid-19 have reversed that progress. Some cities have rolled back the bans on plastic bags and retailers are stopping customers from using reusable bags.

The direct health implications of the COVID-19 pandemic are clear it has caused a million deaths and over 34 million infections worldwide. However, above and beyond these immediate threats to health, EUROPOL and EUIPO are reporting a troubling uptick in cases of pharmaceutical counterfeiting, particularly regarding the international trade in fake pharmaceuticals, which is estimated to be worth in excess of \$4bn (Packaging Europe, 2020).

2. METHODS

A questionnaire was prepared and circulated online using Google Forms to obtain feedback,

regarding their knowledge and perception on effectiveness of Branding and Packaging Design For supporting civil society During the covid-19 pandemic. It consisted of 11 questions, five of this questions on a five-point Likert scale ranging from strongly disagree, disagree, neutral, agree, and strongly agree, Study was conducted on targeted group of 113 person.

Of the participants, 11.2% strongly agreed and 36% agreed that observed the role of civil society organizations during the Covid-19 pandemic; 24.7% strongly agreed and 46.1% agreed The branding has a positive role during the Covid-19 pandemic.; 56.2% strongly agreed and 33.7% agreed that the growth of online shopping during coronavirus.; 14.6% strongly agreed and 44.9% agreed that observed changes in the packaging substrate during the coronavirus pandemic and 18% strongly agreed and 49.4% agreed that The packaging has a positive role during the coronavirus pandemic, as shown in Table 1.

The responses for the questionnaire thus received from the participants were compiled and analyzed using Google Forms software.

4. DISCUSSION

Civil society organizations (CSOs) make a difference in international development. They provide development services and humanitarian relief, innovate in service delivery, build local capacity and advocate with and for the poor (Court et al, 2006). In addition to, it's important role to play in ensuring funds to tackle the Covid-19 pandemic reach their destination by drawing on several examples of online civic engagement (Mullard and Aarvik 2020). The coronavirus pandemic has reshaped industry megatrends in ways that will have major short- and long-term implications for packaging design, to prepare for these changes and the move to the next normal, packaging companies must rethink packaging design beyond "must-haves," such as reasonable costs, convenience, and performance (Feber et al, 2020), This crisis is going to irreversibly accelerate the digitalization of society. It has shown us that there is no such thing as an analogue and a digital life, but that they are the same thing. The world has changed already and it will not be the same again. the online grocery delivery service went from being a nice-to-have service to an essential service overnight. There are significant corruption risks during times of crisis. Donors and multilateral organizations should consider establishing digital accountability networks to support this effort. The current crisis presents challenges for civil society; however, there are also new opportunities for it to embrace digital civic engagement as an anti-corruption initiative (Mullard and Aarvik 2020).

4. COCLUSIONS

Our study reported that majority of the participants in the local society observed changes in the packaging and branding role during the Covid-19 pandemic. When overall rating the role of civil society organizations during the Covid-19 pandemic, 47.2% of the participants were either satisfied or highly satisfied. Therefore, various marketing methods have been used to enhance the effectiveness of Branding and Packaging Design for supporting civil society during the covid-19 pandemic. This study provides a scientific basis about the necessity and feasibility of enhance the role of civil society organizations, especially in crises and supporting the digital community.

5. ACKNOWLEDGMENTS

I would thank the participants who response of questionnaire for their precious help and their opinions.
