Shams Musaed Hussein Al- Musabi

Instructor (Senior B), the Department of Fashion Design and Manufacturing Technology, the Technical College for Girls in Al-Kharj, shamsa@tvtc.gov.sa

Abstract:

The abstract aims to study the international quality systems used in the clothing industry, especially the quality assurance system, Determining the technical specifications for the quality of the stages of graduation gown production in uniform clothing factories. Accordingly, a quality assurance system was applied within the clothing factories, especially the graduation gown, The percentage of specialists' agreement on the quality assurance system on the effectiveness of applying the system within the clothing factory on the production of graduation gowns was measured, Accordingly, the percentage of the specialized professors' agreement on the quality of the graduation gowns produced was measured according to the quality assurance system, The study followed the descriptive, analytical and experimental approaches, The research sample consisted of specialists, professors, faculty members in the field of clothing and textiles, And producers, and they mean production officials in uniform clothing factories, The tools included a job analysis form, A questionnaire to measure the effectiveness of applying the quality assurance system, and a rating scale to measure the percentage of specialist professors agreeing to the quality of the graduation gown, And samples of the proposed design are provided in four different colors,
