

Creating Designs for Women's Transformative Clothes

Dr. Om Mohamed Gabir Al-Sayed Mohamed

Associate Professor of Apparel and Textile, Department of Fashion Design, College of Arts and Design - Qassim University, o.mohamed@qu.edu.sa

Hassa Sulaiman Mohammed Al Mnaea

Trainer, Fashion Design and Manufacturing Technology Department, College of Technology for Girls in Al-Kharj, affiliated with the General Organization for Technical and Vocational Training, Hessa_-fd@hotmail.com

Abstract:

The research aims to study sustainability in women's clothing according to two dimensions: transformability as a basic (functional) dimension. It identifies the necessary features to supply innovative transformative clothing designs with laser technology appropriate for young women aged: (25:35) years. It shows the implemented designs to both (design experts - consumers) to identify their perspectives towards the implemented designs. The study used the descriptive analytical approach with the applied study. The research sample included: 15 specialists, who are the masters of the faculty teaching staff in the field of fashion design to check their reflections about the implemented designs, and the consumers (41), young women aged from 25 to 35 years who are interested in change and renewal. Tools of the study also include two questionnaires to study the reflections of specialists and consumers in the implemented designs.
